

REAL[®] Gutter Cover

BY: Raytec Manufacturing

Easily notched and formed in the field for a tight custom fit to deter pests.

Reverse bend helps eliminate splash over.

More holes per square inch than the others.

48 1/2" allows for 4 ft. coverage with overlap.

- Aluminum available in mill finish 5 or 6 inch.
- Also available in 12 oz. copper.

Hangers with pre-installed screws

Hangers without pre-installed screws

No exaggerated performance claims just a good all round gutter protection product to meet all REAL[®] EXPECTATIONS.

Get REAL[®]: See what installers are saying:

Ryan Bollinger of PA, "the cover installs with ease and is nicely concealed".

Elvin of New Holland, PA, "the installation was fast and easy I found finishing off the ends to be equally quick".

Dave in Wisconsin, "I installed the gutter cover in late summer looking toward the fall and flying leaves", a huge problem in his area of the country. "To my great surprise, not one leaf was lodged in the cover or in the gutter itself. My customers are very pleased".

Rich in Arizona, "I live in an "extreme" area of Arizona. The covers are much easier to install and provided a nice appearance when done. Ponderosa Pines are everywhere and the needles are a big problem when it comes to gutters. So far, the covers have worked flawlessly. No needles, no problems. By far the best metal cover I've seen!"
